* MOAB (Men Overcoming Abusive Behavior) was originally founded by a few local men who endeavored to find ways to recognize and deal with anger and potentially abusive behavior in their relationships. Over the years MOAB has become a safe and confidential environment to talk with other men about things that we may ordinarily harbor or conceal. Listening to others helps us to recognize our own hidden issues so they become easier to deal with. You will hear the testimony of many men whose lives have changed for the better in this self help group.
